

PRONUNCIATION: **AH-BEE GOAL-HAR**

Titles and execution are not enough anymore. Leaders today are expected to understand the financial story behind the strategy. But too often, the P&L and balance sheet still feel like a foreign language.

Today's speaker believes execution keeps the lights on, but financial fluency builds the future. His keynote **Non-Finance Finance Talk** shows how to translate financial data into strategy, identify the numbers that matter, and make smarter, faster decisions that shape growth.

He is a nationally recognized speaker, three-time syndicated radio host, and trusted voice featured in Forbes, Inc., and HuffPost. His work has helped leaders nationwide build the confidence to speak the language of business.

Please join me in welcoming Abhi Golhar.
